Summary

Computer engineering student at ENSEEIHT in software sector, in which I am studying Computer science. Coming from a selective "Classe Préparatoire", which is a two years French school , where I studied hard sciences and developed hard working. I am excited to apply the knowledge and experience I gained both in "classe préparatoire" and at ENSEEIHT to my future job.

Professional and associative Experience

- During a summer I worked as a volunteer for Paris 2024 Olympic Games.. My role was to guide athletes, delegations and drivers of athletes' buses in the welcoming zone of an Olympic competition site. This experience gave me some competences as communicating in English and group working

- During my first year at ENSEEIHT I am engaged in a programm called "Cordée de la Réussite" in which the objective is assisting student at middle school for a project called "Atelier Robotique"

- I did my middle school internship in an architectural firm.

- During middle school I assisted activities in retirement homes and distributed meals to homeless people.

Hobbies

Coding small projects :

- Coding in pair a small chess game named quantum chess. We used HTML/CSS and JavaScript.

- Coding a game solver for the game Hashiwokakero for a project in 2022 and 2023. We used Ocaml.

- Coding small games by myself in HTML/CSS, JavaScript and C#.

Languages : Ada, C, Ocaml, JavaScript, HTML/CSS

Sports :

- Tennis
- Running : Course Rose 10km, Cross 8km

Music (Drums) :

- 7 years of particular courses
